

2010 Harrington Factory Training Schedule

Harrington Signal Certification Training Classes for its Addressable Fire Alarm Control Panel's, is one of the many value-added services provided by Harrington Signal. ESD's must attend a Factory Level "A" Training class to earn or maintain their Level "A" Certification. The 2 or 4 day class will be held each quarter at the factory in Moline, Illinois.

ESD Factory Training is an opportunity for ESD Technicians to gain expertise and certification while working directly with the factory technicians. The interactive Level "A" class provides hands-on training the FireSpy® Series T-8000 & T-2000 FACP's and/or HS Series HS-3030 & HS-3100/HS-3200 FACP's.

Students will receive their Certification upon successful completion of the classroom work, hands-on labs and final testing. Students will receive a set of training manuals, and the latest version of the Fire Alarm Control Panel Programming Software. Therefore, a laptop computer with Windows XP or Vista, is required for each student attending the class, to participate in the hands-on labs, conducted by the Harrington Signal Technical staff.

Please Note: The certification is issued in the name of the person who attained the certification, not the company, therefore if the person leaves your employment, another employee of the ESD will be required attain certification for the ESD to maintain Harrington Signal Level "A" certification (just like many State Licenses).

Harrington Signal will be offering two 2 day classes each quarter, with the first 2 days covering the FireSpy® FACP's and the second 2 days covering the HS series HS-3030 and HS-3100/3200 FACP's. Each 2 day session is \$250.00 per session or both for \$400.00.

Class's start daily at 8:30 am run till 5:00 pm with a 1 hour lunch break, Harrington provides the lunch.

| Dates | Panel Series | Price |
|--------------------------------------|------------------------|--------------|
| <u>1st Quarter</u> | | |

ESD's Please Note:

The certification is in the name of the person who is certified. If this person leaves your employment you will be required to send another to keep your company Harrington certified (just like many State Licenses). Harrington Signal recommends that ESD's consider sending or additionally sending a "Senior Level" employee(s).

Cost for Attendance:

The cost for each 2 day training class session is \$250.00 or \$400.00 for both, to be paid with your registration. This will hold your place on a first come basic. You are responsible for all transportation costs, lodging and evening meals.

For your Information:

Harrington Signal has negotiated special training class rates for lodging at the following hotels: (reference the "Harrington Signal Group" when making the reservation)

- La Quinta Inn(309-762-9008) - \$60.00 Standard and \$72.00 King per night
- Days Inn & Suites(309-762-8300) - \$62.00 Single and \$72.00 Double per night

Numerous other hotels are available in the area, which can be found on all travel web sites.

On-site custom training at your location, is also available, on a special fee basis.

Questions on the training or for a custom training quote please contact Steve Schilb in the Harrington Signal Technical Service Department – 800-577-5758 ext. 239
